PROFESSIONAL SUMMARY

High-achieving **Computer Science graduate** (B.Sc. with Honors, **GPA 3.87/4.0**) specializing in **Front-End Engineering**. Builds responsive, accessible web applications using **React**, **Next.js**, and **TypeScript**, with hands-on experience integrating Generative **AI** workflows and implementing modern communication protocols like **MCP**. Focused on writing clean, maintainable code and delivering polished user experiences through modern state management and optimized rendering.

TECHNICAL SKILLS

Frontend Frameworks: React 19, Next.js, Vite, React Router DOM.

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3.

State & Data Management: Zustand, TanStack Query (React Query), Redux Toolkit, Context API.

Styling & UI: Tailwind CSS, shadcn/ui, Framer Motion, Chakra UI.

Libraries & Auth: Vercel AI SDK, dnd-kit, Leaflet, React Hook Form, JWT, OAuth.

Tooling & Version Control: Git, GitHub, RESTful APIs, Postman, Strapi CMS, ESLint, pnpm.

CS Fundamentals: C++, Object-Oriented Programming (OOP), Data Structures, Algorithms.

Soft Skills: Problem Solving, Cross-functional Collaboration, Mentoring, Adaptability.

PROFESSIONAL EXPERIENCE & INTERNSHIPS

Front-End Developer — Core Team Member | GDG On-Campus Zagazig Dec 2024 – Sep 2025

Mentored 20+ students on modern web development practices, focusing on frontend fundamentals, resulting in an accelerated learning curve and the successful deployment of multiple student projects.

Organized and led 5+ technical workshops and events to strengthen the local developer community's frontend engineering skills.

Shipped community web solutions with the core team, working through weekly code reviews and pair-programming sessions to keep quality consistent across tasks.

Competitive Programming Trainee | ICPC Feb 2025 – Apr 2025

Ranked **Top 10** trainee (**2,321 points**) by solving **139** algorithmic challenges in **C++**, applying advanced **Data Structures** and **Algorithms** to optimize time and space complexity.

Front-End Developer Intern | ITI (Information Technology Institute) Jul 2024 – Sep 2024

Completed **150** hours of intensive hands-on frontend engineering training, mastering **React hooks**, component lifecycles, and **API integrations**.

Delivered 10+ practical tasks and one full-stack graduation project with a cross-functional team, successfully meeting strict industry-standard UI/UX requirements and project deadlines.

KEY PROJECTS

SprintifAI (AI-Powered Productivity Workspace)

Tech: React 19, TypeScript, MCP, Zustand

Graduation Project | High Excellent Demo: x-cloud-frontend-2wj3.vercel.app

Code (Team Repo): github.com/XCloud69

Engineered a standardized data synchronization layer using **Model Context Protocol (MCP)** to optimize bi-directional **Google Calendar** integration.

Developed a dynamic Calendar module capable of rendering 50+ concurrent task events seamlessly through optimized memoization.

Implemented a robust client-side Notification system utilizing **Zustand**, offloading scheduling logic to ensure highly reliable user reminder delivery.

Designed a modular dashboard architecture that maximized UI space efficiency, enabling seamless interaction between AI-generated insights and task management.

Axon Dashboard (AI-Powered ERP)

Tech: React, TypeScript, shadcn/ui, AI SDK

Demo: axon-dashboard-wpvz.vercel.app Code: github.com/emanmohamedsr/axon-dashboard

Solo-architected and designed the entire ERP platform from scratch—including custom UI/UX, theming, and branding—utilizing a scalable feature-based structure with **React** and **shadcn/ui**.

Integrated **Google Gemini** via **Vercel AI SDK**, implementing a custom backend pipeline to deliver "EVE", a real-time streaming AI assistant.

Engineered advanced data modules, including a fully interactive **dnd-kit** Kanban board and a **Leaflet** geospatial map, optimizing global state and caching with **Zustand** and **TanStack Query**.

Kept the interface responsive and keyboard-accessible across desktop and mobile, using semantic HTML and ARIA roles for the drag-and-drop and streaming-chat interactions.

Ma7al (Full-Stack E-commerce Platform)

Tech: React, TypeScript, Redux Toolkit, Strapi, Chakra UI

Demo: full-stack-ecommerce-neon.vercel.app Code: github.com/emanmohamedsr/full-stack-ecommerce

Spearheaded the end-to-end development of a custom e-commerce solution, establishing the visual identity and seamlessly connecting a **React/TypeScript** interface with a **Strapi** backend.

Engineered a comprehensive **authentication** flow (JWT, Email, Google OAuth) with strict client-side validation using **React Hook Form** and **Yup**.

Managed complex global state and API caching using **Redux Toolkit** and **RTK Query**, ensuring seamless cart persistence, advanced filtering, and secure protected routes.

Verified responsive layouts across mobile, tablet, and desktop viewports to ensure a seamless cross-device user experience.

EDUCATION

Bachelor of Computer Science with Honors — Graduated

Sep 2022 – Jul 2026

Zagazig University | GPA: 3.87 / 4.0 (Excellent)

Graduation Project: SprintifAI | Grade: High Excellent

LANGUAGES

Arabic: Native

English: Very Good (Professional)
